New Issue Summary

Sale Date: Dec. 6, 2021

Series: \$75,000,000 General Revenue Bonds (Green Bonds), Series 2021 B;
\$700,000,000 General Revenue Refunding Bonds (Taxable) (Green Bonds), Series 2021 C.

Purpose: Proceeds of the series 2021 B bonds will be used to repay a portion of the authority's outstanding commercial paper. Proceeds of the series 2021 C bonds will be used to refund portions of the authority's outstanding bonds.

Security: The parity general revenue bonds are payable from a first lien on net revenues of the authority, derived largely from wholesale rates and charges assessed on local units of government. The subordinate lien bonds are payable from a second lien on net authority revenues, subordinate only to the authority's lien securing its senior lien obligations.

The affirmation of the 'AA' Issuer Default Rating (IDR), and the 'AA+' and 'AA' ratings on the senior lien and subordinate lien bonds, respectively, reflect the authority's very strong purchaser credit quality, supported by its independent rate-raising ability and unlimited ability to reallocate costs. The authority and its purchasers benefit from very favorable demographics within the primary service area of the Massachusetts commonwealth.

The operating risk profile of the authority is very strong given a very low operating cost burden and a very low life cycle ratio. The authority's leverage, measured as net adjusted debt to adjusted funds available for debt service (FADS), has declined year over year (yoy) for the past five years, registering 9.0x in fiscal 2021. Leverage is expected to continue to trend lower over the next five years to around 7.8x by fiscal 2026, given the authority's capital program has transitioned from costly court-mandated projects to ongoing rehabilitation and water system redundancy.

Fitch Ratings makes a one-notch distinction between the senior and subordinate lien obligations given that the difference in the financial profile between the two liens is considered meaningful and acceleration in the general bond resolution is reserved for senior lien bondholders; subordinate bondholders are precluded from direct remedies until such time as there are no senior bondholders.

Key Rating Drivers

Revenue Defensibility: 'aa'; Very Strong Purchasers and Very Strong Revenue Defensibility: Very strong purchaser credit quality is evidenced by a Purchaser Credit Index (PCI) of 1. Revenues are derived from wholesale agreements that provide for full cost recovery. The authority retains independent legal ability to raise assessments without external approval.

Operating Risk: 'aa'; Very Low Operating Cost Burden: The authority's operating cost burden is very low. Capital costs are focused on system renewal and water system redundancy and no longer focused on court-mandated projects.

Financial Profile: 'aa'; Very Strong Financial Profile: The authority's financial profile is very strong, characterized by declining leverage and ample reserves. The authority's strategic refinancing and defeasance programs contribute to the continuous decline in leverage despite ongoing debt financing of capex.

Rating Sensitivities

Factors that could, individually or collectively, lead to positive rating action/upgrade:

- Continued favorable trend of leverage that more closely approximates 6.0x on a sustained basis within Fitch's base and stress case scenario analysis.

Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Failure or interruption of the continued expected downward trend in leverage to below 9x over the next few years within Fitch's base and stress case scenario analysis.
- Deterioration of the credit quality of the largest purchasers of authority services could pressure the revenue defensibility assessment.
- The senior lien rating could converge at the subordinate lien level if there is a significant erosion of the financial cushion afforded to senior bondholders that results in a lack of meaningful difference in the probability of payment default between the two liens.

Credit Profile

MWRA provides wholesale water and wastewater services to communities located primarily in eastern Massachusetts. About three million people (or 44% of the population of the commonwealth) reside in the authority's service area. The largest of these is the city of Boston, through the Boston Water and Sewer Commission (BWSC; revenue bonds 'AA+' /Stable), which contributes approximately 30% of MWRA's revenue derived from rates and charges. The service area generally is economically diverse, and wealth levels tend to be above the national average.

The authority's ample water supply is drawn primarily from the Quabbin and Wachusett reservoirs and the Ware River. Under present operating rules, the authority's water sources can supply a safe yield of approximately 300 million gallons daily (mgd), which has not been exceeded since 1989. Demand continues to decline due to improvements in water efficiency and increased conservation efforts, making current supply more than sufficient to meet demand through at least 2060. The system operates two relatively new water treatment plants with a combined treatment capacity of 428 mgd, which is more than sufficient capacity to meet the average demand of less than 200 mgd.

Retail customers of the authority collect and convey wastewater to MWRA, which provides transport and treatment at its two wastewater treatment facilities for combined average daily flow treatment capacity of 365 mgd. Average daily flows for the past five years register just over 300 mgd.

Coronavirus Considerations – Limited Impact

The authority's most recently available performance data does not indicate impairment from the coronavirus pandemic.

Revenue Defensibility

Revenue defensibility is very strong at 'aa', supported by the authority's independent rate-setting authority and ability to reallocate costs among purchasing entities to provide for full cost recovery. The assessment is also supported by the very strong purchaser credit quality, represented by a PCI of 1. The largest purchasing member communities include BWSC, Newton, Quincy and Cambridge, which make up more than 40% of authority revenues.

Authority revenues are derived from assessment on the 61 local communities included in the service area, which are required to pay for MWRA services as a general obligation. Furthermore, rate-setting is not subject to any limitations, including the state's Proposition 2 1/2. These protections, coupled with the authority's ability (pursuant to its enabling act) to utilize a local aid intercept to recover amounts unpaid by one of its member communities (excluding revenues of BWSC and other special-purpose local bodies), provide significant revenue protection.

A	Assigned		6/8/99

Over the past five years through fiscal 2021, the authority raised rates on average a moderate 2.7% annually, while raising rates just 1% in fiscal 2021 to provide rate relief during the pandemic. Continuous conservative budgeting practices and cost containment measures allowed for a lower fiscal 2021 rate adjustment without compromising operations or financial performance.

The authority has adopted a 2.95% rate adjustment for fiscal 2022 and future annual rate adjustments are expected to return the historical norms of 3.5% or less. However, MWRA's long-term rate forecasts continue to trend below prior estimates. Combined rates originally were projected to climb by as much as 5.2% annually by 2021 but are now estimated to increase by no more than 3.5% through fiscal 2026. Actual rate adjustments may be less, as MWRA has been prudently applying surplus revenues to level off near-term escalations in debt service costs.

No asymmetric rating factor considerations affect the revenue defensibility assessment.

Operating Risk

Operating risk is assessed as very strong at 'aa', supported by a very low operating cost burden in conjunction with low life cycle investment needs that are supported by adequate capital investment. The operating cost burden is very low, averaging about \$2,700 per million gallons (mg) for the past five years and comfortably below the 'aa' assessment threshold of \$6,500 mg. Operating costs are expected to increase based on inflationary costs and generally stable demand but will likely remain within the 'aa' assessment for the foreseeable future.

The spending for capital projects spanning fiscal years 2022–2026 is estimated at \$1.7 billion and continues to shift focus towards renewal and replacement of system assets and water redundancy and away from regulatory compliance projects. The authority is in the early planning stages of a large-scale project to support system redundancy. The Tunnel Redundancy Project total costs are currently estimated at \$1.5 billion with the bulk of the spending for the project (\$980 million) starting around fiscal 2031.

Since 2003, the MWRA's board has adopted five-year spending caps for capital spending. The fiscal 2019–2023 cap of \$984.8 million is up from the prior fiscal 2014–2018 cap of \$791 million. Despite the uptick in expected spending, Fitch believes future capital costs will remain manageable given MWRA's vigilant project oversight and its board's self-imposed spending cap for capital projects.

MWRA maintains a 40-year master plan for the system that is updated every five years. The plan was last updated in fiscal 2018 and totaled \$5.75 billion, which includes \$2.58 billion for water projects and \$3.17 billion for sewer projects. About 69% of the water projects are focused on water redundancy, with remaining projects related to ongoing asset protection and rehabilitation; over 90% of wastewater projects are related to ongoing asset protection and rehabilitation.

Funding for capital needs will continue to come almost entirely from long-term borrowings, including revenue bonds, state revolving fund loans and commercial paper notes. The authority's capital improvement plan remains sizable but is significantly below historical spending levels, which were driven by the cleanup of Boston Harbor in the 1990s and the completion of the majority of the combined sewer overflow (CSO) control plan in recent years.

With all court-mandated CSO projects substantially completed in 2015, the five-year average capex has reflected a slowdown in capital investment, with the five-year capex/depreciation averaging just 70%. This has resulted in an increase in the life cycle ratio to 45% as of fiscal 2021.

No asymmetric rating factor considerations affect the operating risks assessment.

Financial Profile

The financial profile is very strong, assessed at 'aa'. The authority's leverage continues its downward trend to 9.0x for fiscal 2021, down from 10.4x in fiscal 2017. The authority's continuous declining leverage is supported by the strategic defeasance of outstanding debt obligations from budget surplus and refinancing opportunities. Since fiscal 2006 the authority has defeased over \$717 million in debt service.

The liquidity profile is considered neutral to the assessment. The authority's coverage of full obligations (COFO) was just under 1.0x for fiscals 2018–2020, but concerns are mitigated given the favorable liquidity cushion of 211 days for fiscal 2021; COFO for fiscal 2021 registered at 1.1x.

Fitch notes the meaningful difference between Fitch-calculated debt service coverage (DSC) on the senior lien compared to the all-in DSC as support for the one-notch differential between the senior and subordinate liens. Historical Fitch-calculated DSC on senior lien obligations has averaged 1.9x since 2017, while all-in DSC has been generally sum-sufficient. The Fitch-calculated all-in DSC includes subordinate public debt and privately placed state revolving fund loans. Further supporting the meaningful difference in financial profile is that the authority's senior lien debt accounts for about 60% of its total debt outstanding.

Management forecasts point to continued stable financial margins based on the authority's conservative budgeting practices. DSC is expected to remain near historical norms and generate surpluses that the authority expects to use to defease future debt maturities. MWRA's positive variances are driven by conservative budgeting estimates (particularly with regard to variable interest rate costs) and tight expenditure controls.

Fitch Analytical Stress Test (FAST)

The FAST considers the potential trend of key ratios in a base case and a stress case, with the stress case designed to impose capital costs 10% above expected levels and evaluate potential variability in projected key ratios. The authority's current expense budget informed Fitch's base case for fiscal 2022, along with management's planned capital spending and debt financing. Fitch made reasonable assumptions regarding revenue growth from fiscal 2023 to 2026 based on anticipated rate adjustments. Expense growth assumptions for fiscal years 2023 to 2026 are commensurable with expense growth from the authority's budgeted fiscal 2021 to budgeted fiscal 2022 figures.

Leverage in the FAST base case declines yoy, falling to 7.8x by fiscal 2026, with the stress case reflecting a similar trend of leverage to 8.1x by fiscal 2026. Fitch expects leverage to continue this downward trend past the fiscal 2026 forward look based on the expectation that annual capital spending does not increase materially.

ESG Considerations

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/esg.

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
