METROPOLITAN WATER TUNNEL PROGRAM

NOTICE TO ABUTTERS

Weston

The Massachusetts Water Resources Authority (MWRA) will be conducting field work to support a major water supply tunnel program in the Metropolitan Boston Area. The two proposed water tunnels will improve reliability for our water infrastructure and allow our aging existing water tunnel system to be rehabilitated without interrupting service.

As part of the design effort, MWRA has hired CDM Smith and other firms to perform geophysical survey in the Program study area. The geophysical survey will include non-intrusive seismic survey to evaluate subsurface geologic conditions.

The seismic survey will involve blocking of a narrow strip of land, placing a line of small sensors on ground surface that are connected to a seismograph for data recording, and hitting the ground with a sledgehammer or weight. No excavation or heavy equipment will be used. At each location, the work is estimated to take between one and three days to complete.

MWRA has planned for geophysical survey activities within the Leo J. Martin Memorial Golf Course at 190 Park Road, Weston. The work will be in the area around Hole 2 through 6 and visible from Park Road and Recreation Road, but all work will take place on golf course property in coordination with DCR.

Work is scheduled to begin the week of 6/6/2022, weather dependent, and occur typically between 7:00 a.m. and 5:00 p.m., Monday through Friday. A portion of the work crossing the middle of the golf course will occur between the hours of approximately 6:00 p.m. and 5:00 a.m. to limit impact on golf course operation. Construction Zone Safety Plans will be provided to ensuring worker and general public safety in each area.
